***Allowable Subject Matter***

2. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-13 are found to be in condition for allowance.

***Reasons for Allowance***

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an apparatus and process for coding images according to a non-object based coding standard comprising a step of coding a video object so as to form an elementary stream, coding a segmentation key relating to the video object so as to form an elementary stream, coding a background image into which the object is to be inserted so as to form an elementary stream, and multiplexing the elementary streams relating to one or more objects and to the background image so as to provide a program stream or transport stream according to said standard.

It is noted that the closest prior art of record (Sun et al. US 6,678,416) teaches *"coding a video object so as to form an elementary stream, coding a segmentation key relating to the video object so as to form an elementary stream, coding a background*

*image into which the object is to be inserted so as to form an elementary stream, and multiplexing the elementary streams relating to one or more objects and to the background image so as to provide a program stream or transport stream according to said standard” as specified in the claims.*

### **Conclusion**

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
